Model # of Mobil Unit—

Model #

Found an old Mobile Radio
of that vintage—

7c 10:05A 9/17 Talked to [redacted]
explained to him as to what
I needed re equipment questions
said he would check to see
if he could find the data
& call me back—

[redacted] 9/19/85

Ch. 2 = parade traffic Simplex

the result to talking to 5 different
people
some of the things they recall for
sure -

[redacted] - dispatcher
McClain

Motorola
radio Model T31 Bat - 1130A

Sample Radio Motorola

Transistorized Dispatcher Radiophone
Ser # G26786
Transmitter type CC1500
Model T31 BAT - 1130A
Motorola Inc, Chicago, Ill.

The same radio was in the
two-wheeler & the three wheeler
had to have same failure in the mike.

7c [redacted] ⑤ 9/19

quality of phones line were better in 1963

standard mobil mike

not noise cancelling mike -
non noise cancelling circuitry

mike would have been a Motorola

Chart n for ch: 2

W.E. - western Electric

bell - going over a man hole cover

WRR type equipment -
broadcast quality audio

7c [redacted]

2700 [illegible]

voice grade phone lines

frequency limitation was the recording device itself - recording system was always a joke -
45 megahertz band were very noisy
